## TEMPLATE CUSTOMIZATION

### Customize It Yourself

**!IMPORTANT! The Easiest And The Quickest Way To Customize A Template:**

1. **Install Good HTML Editor. I Strongly Recommend Notepad++. It Is Awesome And It Is FREE.**

<http://notepad-plus-plus.org/download/> (Windows Only)

If You Are Using Mac, I Suggest Subline

<http://www.sublimetext.com/2> (Mac)

2. **Each Template Is Located In Its Own Folder. Extract It Using WinZip Or WinRar Or Any Other Software.**
3. **Find “index.html”. Right-Click to “EDIT with Notepad++”**
4. **Look For The Code In “GREEN”. Those Are Your Instructions You Should Follow. The Code In “GREEN” Can Be Removed.**
5. **The Quickest Way To Replace The Content (Example)**

- Find The Content You Want To Replace e.g. Phone Number

```
<ul data-role="listview" data-inset="false">
<li data-icon="phone"><a href="tel:18881234567">Call</a></li><!-- /REPLACE PHONE NUMBER -->
<li data-icon="mail"><a href="mailto:info@my-email.com">Email</a></li><!-- /REPLACE EMAIL AI
<li data-icon="location"><a href="https://goo.gl/maps/S2bBT">Map</a></li><!-- /REPLACE GOOGI
</ul>
```

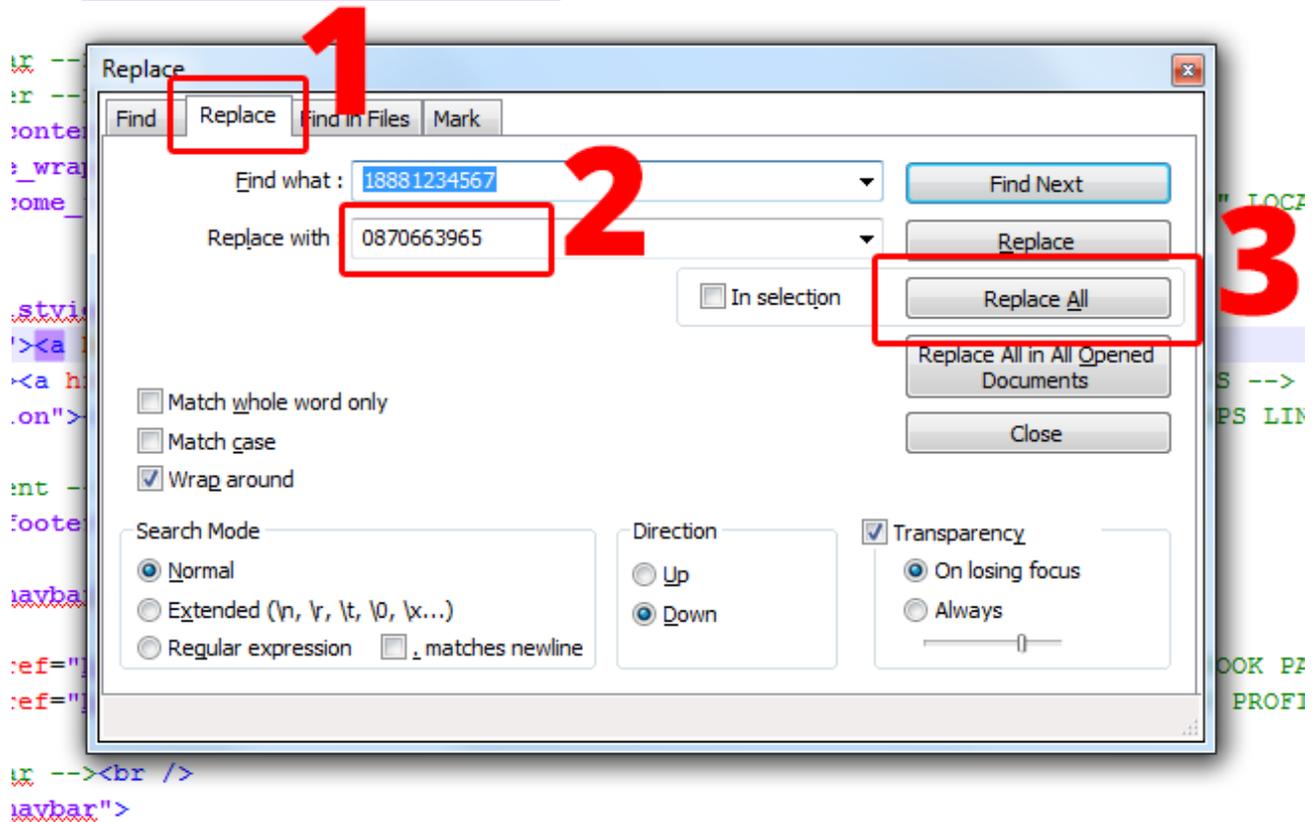

- Highlight It

```
listview" data-inset="false">
'><a href="tel:18881234567">Call</a><
<a href="mailto:info@my-email.com">Ei
```

- Press “Ctrl + F” On Your Keyboard
- Navigate To “Replace” Tab
- In “Replace With” Field Enter Your Own Phone Number
- Click On “Replace All”

## - Repeat The Process With Other Variables
