

Installing a plugin

1. Go to your WP admin panel
2. Navigate to Plugins -> Add new -> Upload
3. Select the zip package and press Install

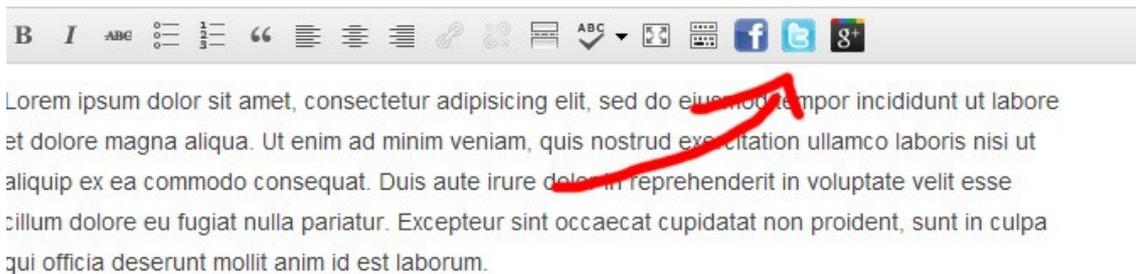

Settings

To change this plugin settings

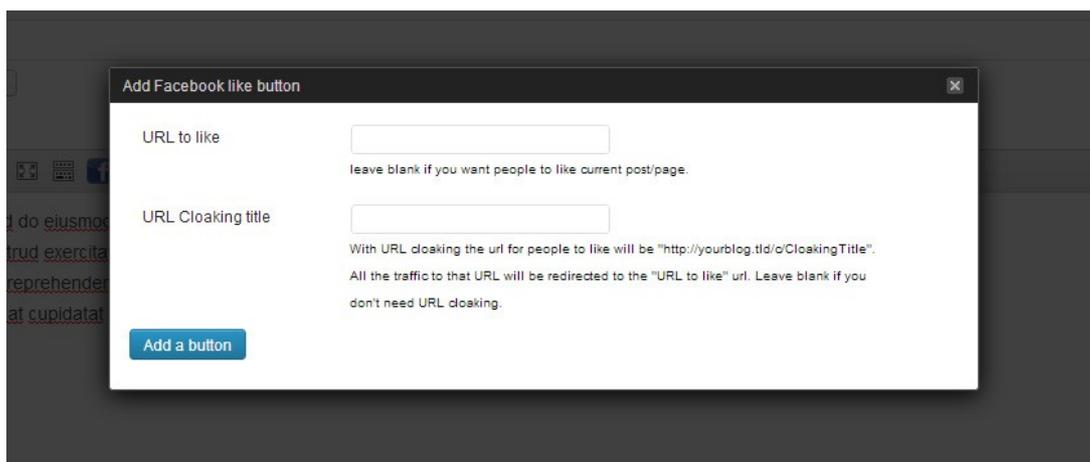

1. Click Settings in your admin panel
2. Click *Socialbuttons Options* in the submenu

How to use this plugin

1. Edit the page where you want to add social buttons. You should see the social icons on the top of the editor.

2. Now click the place in your page content where you want to add social button. Then click the social icon on the top of the editor and you should see the popup.

3. If you don't need any optional settings (like custom like URL), just leave those fields blank and click "Add a button".

Optional settings:

- **URL to like** : This is for custom like URLs. For example if your blog post is <http://yourblog.tld/post-title> and you want people to like your product page which has different URL, just add the URL to this field.
- **URL Cloaking title** : This is for cloaking the like URL. For example if you have an affiliate URL that you don't want people to see, add the URL into the "URL to like" and then add your products title into this field. The URL for like buttons will be

<http://yourblog.tld/c/CLOAKINGTITLE>

And that CLOAKINGTITLE is the title you put into "URL Cloaking title" field.

For that URL the plugin will create a permanent (301) redirect to your affiliate URL. So basically people will like the CLOAKED URL, but will be redirected to URL_TO_LIKE url when they click the link in the social media site.

How to rebrand this plugin

1. Extract the .zip file
2. Open *socialbuttons.php* in the text editor (for example notepad). You should see something like below.
3. Just edit those Author lines and URLs you like. After editing archive plugin files back to .zip package.
4. Now you can start selling that plugin with your own Author details.

```
/*
Plugin Name: Social buttons plugin
Plugin URI: http://www.rebrandrights.com/
Description: See "Socialbuttons - How to use.pdf"
Version: 1.0
Author: Alex Blades, Rebrand Rights
Author URI: http://rebrandrights.com/
*/

/*=====
```

5. This will rebrand the authors box shown below

<input type="checkbox"/>	Social buttons plugin	See " <u>Socialbuttons - How to use.pdf</u> "
	Deactivate Edit	Version 1.0 By Alex Blades, Rebrand Rights Visit plugin site
