What are viral facebook fanpages and why should you create them?

Don't know what facebook fanpages are?

Facebook, a social networking site with over 500 million users, has set up a system where you can add a page to their site. This page could be a site for your business, for you as a person, for a charity or cause or anything else you would like.

For us internet marketers, we use it to target a niche or product group that we can market to.

By having a fanpage like this, you can invite people to “like” or join your fanpage. These people can then invite all their facebook friends to also join your facebook fanpage. This means that the more people that like your page, the more people would see that their friends “liked” your page. This can cause your page to go viral, meaning it will keep on getting massive amounts of fans without you having to invite anyone.

So what do you do after you have a fanpage with thousands of fans?

You monetize it, meaning you create a way that you can profit from it. This is so easy, because you can post an update on the fanpage, which your fans will see on their facebook news feed. This means that every time you make an update, thousands of people would see your update or advertisement and potentially hundreds of them could click on them, of which many will buy your product or complete your offer, which in turn would make you money.

And this is where the beauty of facebook fanpages lie. If you can create a huge fanpage with lots of fans, the sky is the limit on how many ways you can profit with this fanpage.

HOT Niches/Markets/ideas to go after for your Fanpages

Many internet marketers already know how powerful Facebook Fanpages could be for driving traffic and boosting your online profits. There are hundreds if not thousands of internet marketers and businesses who are making full time incomes just by marketing through Facebook fanpages.

Imagine how endless the possibilities would be if you had a fanpage with a 124,560 fans. You will have true push button traffic at your fingertips.

For example, take a look at the following Fanpages and notice the topics and the number of people who have joined.

You can use these for ideas on how you can also create a viral fanpage. Remember – people want something that will them smile, shock them, interest them or that will amaze them. Find out what people WANT. Catchy, slang, or “hot” street talk is also effective sometimes.

These are just some of the viral types of Fanpages you can create.

Remember people will join your fanpage if they can relate to something. Some of the Fanpages are so simple but powerful because people can relate to them. These events are occurring in our everyday lives.

Always try to create a fanpage that is unique and has never been done before.

Once your Fanpage goes viral you will find it will end up having a “snow ball” effect and you will not need to do any promotion.
