

Accordion FAQ Generator v.2.0

USER MANUAL

"Thank You For Purchasing "Accordion FAQ Generator v.2.0"

Installation

No installation needed!

Just double click on the "AccordionFAQ.exe" file you found in this folder to open software.

How To Use

This software is designed to be very easy to use.

All you really have to do is fill in information the way you would do when you are filling out any other form.

Step #1:

Open up the software.

Step #2:

Simply follow the instructions in the software filling in the required information as you go.

Step #3

Once, you are done, you can save the Accordion FAQ HTML code as a text file on your computer, or copy it to your clipboard.

Step #4

Follow the instructions in the text file, on how to insert the button code into any HTML file. Then upload your edited HTML page to your server and link to it. Your sales page with the Accordion FAQ should now be ACTIVE.

e.g. <http://www.yourdomain.com/salespage.html>

*** If you DO NOT have a server, you can copy the HTML code and paste into any free service e.g. blogger that allows HTML code.*

How To Add More Accordion FAQs

If you want to add more questions, you will have to manually add them...

```
<div class="accordion-section">  
<a class="accordion-section-title" href="#accordion-6">Accordion Question  
Text Goes Here</a>  
<div id="accordion-6" class="accordion-section-content">  
<p>Accordion Answer Text Goes Here</p>  
</div>  
</div>
```

Edit the bold sections in the code above. The number should also be changed with each question that you add i.e. 7, 8,9, 10 etc

Paste the code above the last </div> for each extra question that you add to your Accordion FAQ section.

Additional User Tips

User Tip #1: When the field asks you to enter your color choice, the color codes in the example are the same color codes as in the demo pages. You can just copy and use those as your preferred color choices.

User Tip #2: You can manually adjust the width of the table the code is contained by changing the "**table width="90%"**" value. You can change the value to a percentage of your main sales page or an actual value in pixels.

User Tip #3: You can change the font type & size of the text within the accordion FAQ by directly editing the generated HTML code.

Have fun with the software! :)
