

# I.How To Install Wordpress

## *Option 1*

1. Go to [www.wordpress.org](http://www.wordpress.org)
2. Download Wordpress to your hard drive
3. Follow the steps that are here [http://codex.wordpress.org/Installing\\_WordPress#Famous\\_5-Minute\\_Install](http://codex.wordpress.org/Installing_WordPress#Famous_5-Minute_Install)

## *Option 2 - If you have cPanel and Fantastico*

1. Log in to your cPanel
2. Click Fantastico De Luxe
3. Click Wordpress on the left
4. Click New Installation
5. Select the domain name where you want to install it
6. Put your login and password in Admin access data area
7. Click Install WordPress
8. Click Finish Installation

# II.How To Install Theme And Plugin

1. Connect to your server using FTP client (I use Fetch for Mac, for Windows try CuteFTP)
2. Go to the location where you installed Wordpress
3. Go back to your folder where you unpacked all the files from the package
4. Upload the folder inside Wordpress Theme (it will be the name of the theme) to wp-content > themes on your server
5. Go back to your Wordpress admin panel and click Appearance on the left menu
6. In Manage Themes click Activate near the theme you uploaded
7. Now upload folders that are inside Brave Minisite Plugin in your package to wp-content > plugins on your server
8. Go back to your Wordpress admin panel and click Plugins on the left menu
9. Click activate for Brave Minisite and TimeMCE Advanced plugins
10. Upload and replace ui.css in wp-includes > js > tinymce > themes > advanced > skins > wp\_theme
11. Go to Settings and TimeMCE Advanced on the left menu in your admin panel in Wordpress. The second row and the third row have to be empty. Choose the icons you want in the first row. Just drag and drop to add and remove icons.
12. In Advanced select Import the current theme CSS classes
13. Click Save Changes
