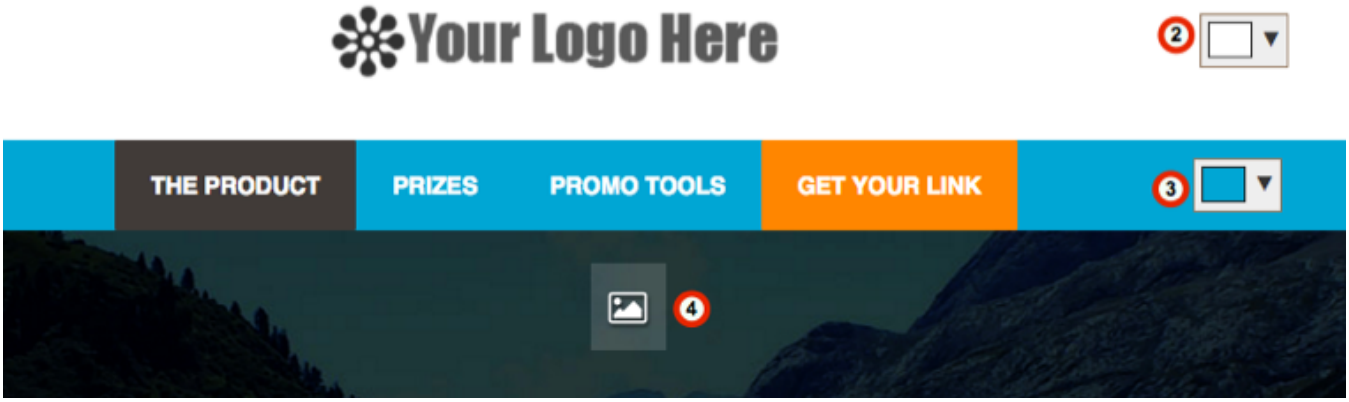
Turbo JV Page Builder PRO - Additional features

This illustrated PDF guide will introduce you to the additional features included to the PRO version of the Turbo JV Page Builder.

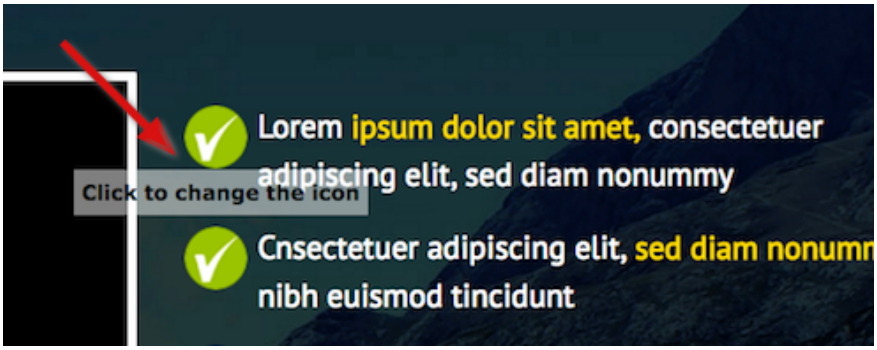
1 Home



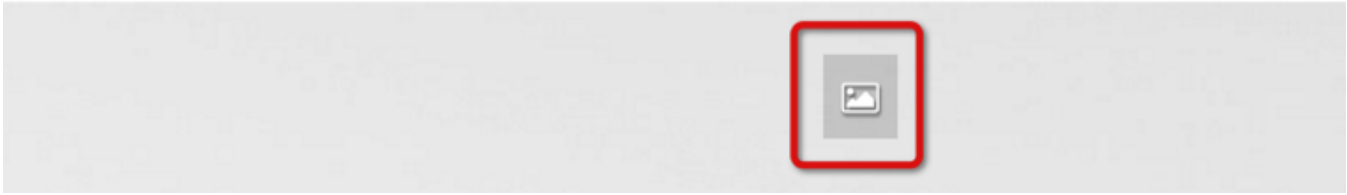
- You can add custom HTML code that will be inserted before the </head> tag (1) (useful when using a tracker or any other analytics software)
- You can change the colors of the headings' sections (2) (3)
- You can click on the icon to change the background's image (4)

You can also change the icons as displayed below.

2

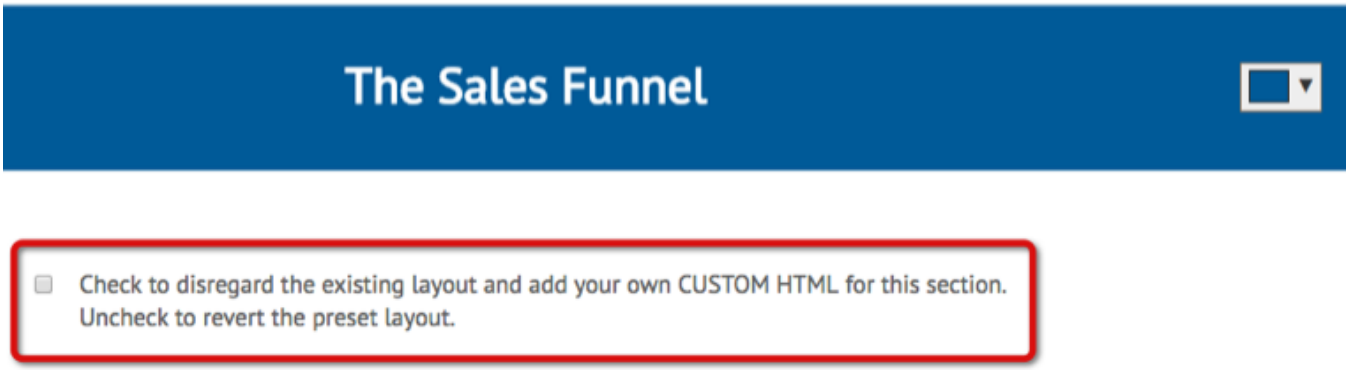


3 The Product



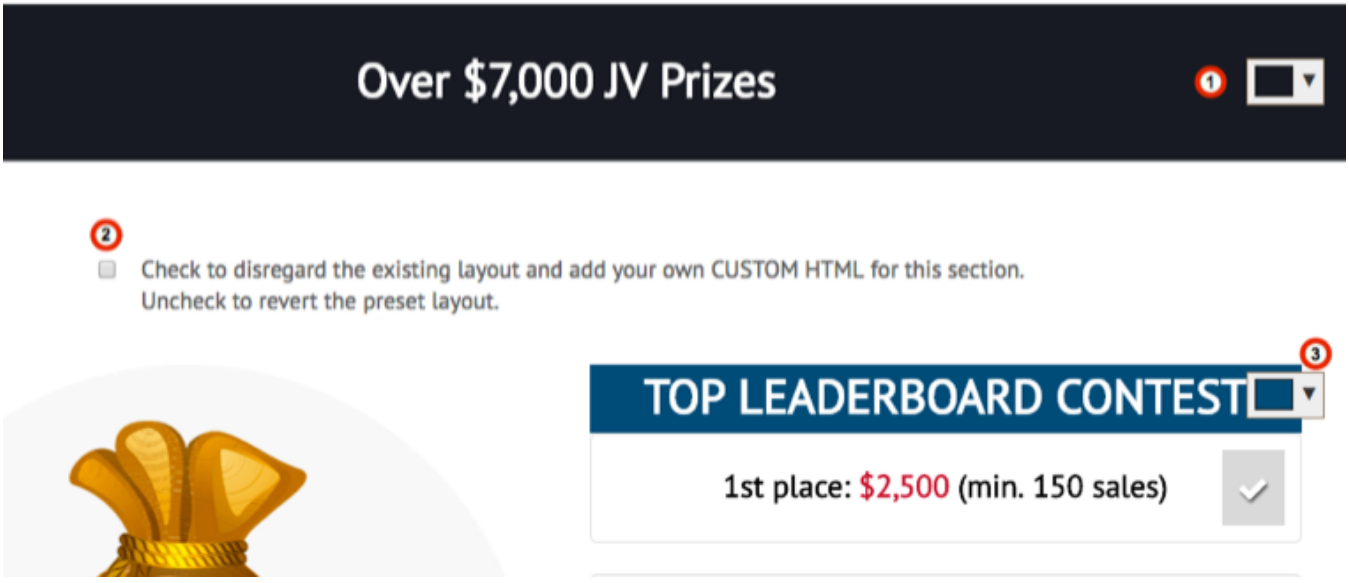
You can click on the icon to change the background's image.

4 Funnel's section



As it's noted, you can check the checkbox to disregard the existing layout and add your own CUSTOM HTML for this section. If you have made changes and want to revert to the preset layout you can uncheck the checkbox.

5 Prizes



- You can change the color of the heading's section (1)
- You can check the checkbox to disregard the existing layout and add your own CUSTOM HTML for this section (2). If you have made changes and want to revert to the preset layout you can uncheck the

checkbox.
- You can change the color of the table's heading (3)

6 FAQ

- You can change the color of the heading's section (1)
- You can click on the icon to change the background's image (2)

You can also change the icons as displayed below.
